## TECHNOLOGIES & SKILLS

HTML / HTML5	RESTful API Design	Protractor / Jasmine
CSS3 / SASS	Git / Version Control	ODM / Mongoose
JavaScript	Google Maps API / GIS	Ruby / Rails
Angular	Node.js / Express	OAuth / JWT
Web Sockets	SQL/NoSQL	Python / Django

---

## EXPERIENCE & RECENT PROJECTS

### **VERTIBA** | Front End Developer | Boulder, CO | May 2017 – October 2017

- Developed front end of single page application using Ionic and Angular to scaffold the mobile hybrid app
- Wrote client side routing services to create, read, update, and delete account information
- Utilized protractorJS and Selenium server for end-to-end testing
- Managed, pushed, and resolved code conflicts using git

### **RUNNERSLINK** | Full Stack Developer | Boulder, CO | January 2017 – Present

- Design, build, and continually maintain all aspects of the application
- Streamlined client's vision into a end user experience that is clean and device agnostic (responsive design)
- Utilize Google Maps Javascript API to create, read, and update custom map and markers and returns points of interest
- The API is capable of geospatial querying with results based on user current location
- Utilize node I/O and nodemailer to send push notifications

### **YEAHORNAY** | Full Stack Developer | *yeaornay.herokuapp.com* | January 2017 – March 2017

- Pair programmed and participated in daily code reviews to refactor Angular, RESTful APIs, and PostgreSQL queries
- Managed unique users/voters by tracking session information

### **YAHTZOO** | Front End Developer | *rollem.herokuapp.com* | January 2016

- Leveraged HTML, CSS, Javascript, and jQuery to create a replica of the classic board game Yahtzee
- Users are assigned a player profile and their stats persist using MongoDB, which was built on NodeJS and ExpressJS
- Built an additional replica using Ruby and Ruby on Rails

---

## EDUCATION

### **University of Colorado | Boulder, CO | 2007-2011**

Psychology, B.A.

### **Galvanize | Boulder, CO | 2015-2016**

Full Stack Immersive

---

## OTHER EXPERIENCE

### **FINANCE AND DATA ANALYST** | Alpha Theory Advisors | Remote | February 2015 – July 2015

- Programmatically aggregated JSON and YAML files from RESTFUL API, culled superfluous data, and charted risk exposure using excel VBA

### **ASSET RISK ANALYST** | Pacific Gas & Electric Company | San Francisco | January 2012 – February 2015

- Built prototype utilizing MS Access, SQL, and VBA to store data, generate reports, and provide functional UI
